Reviewer Comments:

<210> 1  
<211> 1749  
<212> DNA  
<213> pMC74 plasmid coding sequence

Numeric Identifier <213> can only be one of three choices, "Scientific name, i.e. Genus/species, Unknown or Artificial Sequence." For all sequences using "Unknown or Artificial sequence", for numeric identifier <213>, a mandatory feature is required to explain the source of the genetic material. The feature consists of <220>, which remains blank, and <223>, which states the source of the genetic material. Suggest using "Artificial sequence" for numeric identifier <213> and "Synthetic" for numeric identifier <223> in the mandatory feature. Please check for similar errors and make all necessary changes

\*\*\*\*\*

Application No: 10562627 Version No: 3.0

**Input Set:**

**Output Set:**

**Started:** 2009-08-20 22:30:10.535  
**Finished:** 2009-08-20 22:30:11.973  
**Elapsed:** 0 hr(s) 0 min(s) 1 sec(s) 438 ms  
**Total Warnings:** 13  
**Total Errors:** 0  
**No. of SeqIDs Defined:** 13  
**Actual SeqID Count:** 13
